Multimedia Semantic Analysis in the Service of the Media Industry

Athens · December 6, 2006
“I am a digital immigrant. I wasn’t on the web, nor coddled on a computer... My two young daughters, on the other hand, will be digital natives. They will never know a world without ubiquitous broadband internet access.”

Rupert Murdoch, media Baron
Speaking at the American Society of Newspaper Editors
There’s a dramatic revolution taking place in the news business today...

...the habits of news consumption are rapidly changing...

The future course of news is being altered by technology-savvy young people no longer accessing news in traditional ways.
WHAT do Young people want and WHERE will they go to get it?

- They want News ON DEMAND continuously updated!
- They want a point of view about not just WHAT happened, but WHY it happened!
- They want the option to go out and get MORE information!
The newspaper is changing towards being a DESTINATION

INTERNET PORTALS

- Google News’s traffic increased 90% over 2005
- New York Times’ excellent website decreased 23%! 
WILL NEWS BE FREE?

Most information on the Web is free

The popularity of Free Papers is growing

For instance, Free Paper “METRO”:

- Distributes more than 6 million copies a day
- Is being read by 17 million people
- It’s the WORLD’S 3RD MOST READ PAPER!
WILL ALL NEWS BE FREE?

Some papers - print & online - have moved to a ‘cost saving’ model:

FREE news but with LESS features!

There is evidence that Media will move in this direction;

...giving everything away for FREE also gives the impression that news SHOULD be free, or worse, that it has NO VALUE!
The NEW YORK TIMES’ Experiment

“Charge for PREMIUM online content”

A $49.95 subscription option provides:

- The key to certain Times & International Herald Tribune columnists
- Photo essays
- Pod casting

- The Times archive
- Video
- Pre-views of what is to be printed on the Sunday newspaper

The New York Times
The NEW YORK TIMES’ Experiment
“Charge for PREMIUM online content”

The break down from paid Content is:

Online NEW Subscribers: 135,000
Print NEW Subscribers: 125,000
Total Revenue: $ 5 mil. /year
The emerging Media Ecosystem;
CITIZEN JOURNALISTS & BLOGGERS

Information Communities and blogospheres produce:

- Citizen journalism
- Eyewitness accounts
- Annotative reporting
- Fact-checking
- Stories & new ideas
The emerging Media Ecosystem; CITIZEN JOURNALISTS & BLOGGERS

According to the latest Columbia University Survey of the Media:

- 51% of journalists are using weblogs regularly
- 28% rely on them for daily reporting

...As Blogs continue to gain in Popularity, Quality and Influence, it is becoming imperative that journalists will continue to integrate with them...”
The Media setting is rapidly changing ...

MORE information, MORE sources, MORE services, MORE...

But MORE sometimes diminishes RELIABILITY

The power of the Web, of news Aggregators, search engines, blogs, is generating a NEW MEDIA ECOSYSTEM ...

*Is the media industry ready to lead newsrooms in the Semantic age of Journalism?*
